

ATTENTION WEST VIRGINIA STUDENTS:

NASA West Virginia Space Grant Consortium and Trinity Christian School need YOUR help!

We are on a mission to send high-altitude balloon systems into our atmosphere to collect data during the upcoming partial and total eclipses. Every NASA mission needs a mission patch, and we want you to help us design them! We invite all West Virginia students to create and submit their own creative patches so we can find the perfect one for our high-altitude balloon launches. Winners will receive prizes!

Hand-drawn and virtual patch ideas can be submitted to wvspacegrant@gmail.com for judging. Deadline is May 15th, 2023.

Find additional information on our website and social media.
